

SMART Photo Server

for successfactors™

Get the employee pictures in you SuccessFactors solution

Which team would you like to work with?

Background

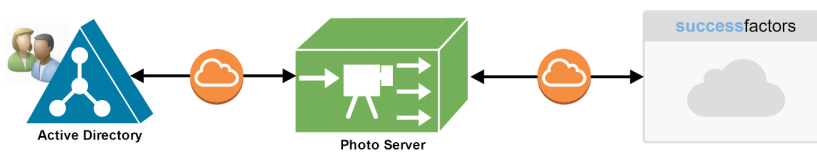

Having updated photos of you employees in your SuccessFactors application makes it more alive and user friendly. As new customer on the SuccessFactors platform, you need to integrate your employee photo library to the SuccessFactors application before starting testing and go-live – it simply makes the SuccessFactors so much more welcoming.

To seamless integrate your existing photos to the SuccessFactors application you need the SAP Photo Server. This solution enables your existing employee photos. The solution integrates pictures from Microsoft Active Directory or an alternative picture library if your company ex. holds the pictures in an ID card system or similar.

Business Benefits

Don't spent you expensive administration time managing employee photos twice – have it all automated using the SMART Photo server.

The SMART server admin interface makes easy for you to setup the integration – when setup, your integration is fully integrated. When a new employee is created in you existing solution the picture is automatically updated in SuccessFactors, without you having to do additional administration.

Integration between any photo sources and successfactors

Key Features

- Integration to Active Directory
- Integration to alternative photo store
- Scheduled integration engine
- Web based administrator interface
- SSL encrypted web traffic
- Blacklist of private SuccessFactors accounts
- Traffic logging

The SMART Photo Server can be delivered from a price of 14.499 Euro

About 2BM

2BM is one of the leading consultancies within Enterprise Mobility and SAP HCM in the Nordic region. We are an innovative and business-oriented consulting and software company offering competent and dedicated people with insight in tomorrow's solutions and technology.

The company focuses on the development and implementation of mobile solutions for enterprises and develops and implements innovative mobile solutions using back-end and mobile device-independent Enterprise Mobility platforms.
